“How Do You Stay Grounded As A Worship Leader.”

By PraiseCharts Live Contributors

<http://www.worshipteamtraining.com/ForumTopics.html>

We have seen more changes in the contemporary church than any other time in its history. The role of the worship leader changes overtime as well due to the many demands and pressing concerns. From the differences in facilitating worship, to team leadership and staff development. Each of these environments have their own set of challenges, along with many more issues that are not listed. What are your Top 5 concerns as a worship leader?

Terri Welch

1. trying to please everyone -- so many different styles of music
2. training your team to display passion as they lead worship
3. getting pulled this way and that -- pastor wants one thing, congregation wants another...
4. finding time to do it all -- rehearse, choose songs, etc.
5. keeping it all centered on God and not just checking the box.

2. Getting beyond "pleasing people" to a place where you can help them grow regardless of how the method fits their preferences
3. Quality communication and unity with pastoral (and board) leadership
4. Emphasis on worship over music
5. Engaging the church to be active participants rather than passive observers

4. Forgotten Stories: Re-Broadcast

<http://www.forgottenstories.org>

The Invitation is a visual and musical experience that captures stories in a city dump where over 14,000 families live in the Philippines. On our adventure we discovered children who were overcoming unbeatable odds. We were challenged to ask ourselves, "What would happen if we accepted the greatest invitation in history?"

Mission:

Funding of programs will consist of educational scholarships that also include food and medical distribution focused on giving children a hope for the future.

Rocket Rods & Stealth Rods http://www.promark.com/products/view_cat.cfm?category_id=83dc0668-083b-4d6d-9cd6-e0c81603d420&mode=sub_cat&xnum=1

Pro-Mark started a trend when we introduced the original Rods®. Over the years, other companies have tried unsuccessfully to duplicate their unique sound and feel.

The Rocket Rods are made of bamboo dowels while the Stealth Rods are made of nylon bristles. Voted one of the top 15 percussion products of the last 25 years, the Rods family produces a lower volume than sticks, but more attack than brushes...perfect for a variety of applications. When regular sticks are too loud, and brushes are too soft, Rods are just right. Handmade in the USA. The Hot, Cool, Thunder, Lightning, and Kick Rods are made of select birch dowels.
